

The Natural Way To Combat Health Problems!

At *bionetics*, we believe that the body has a natural ability to heal itself and maintain good health.

We believe that harnessing and boosting this ability is the best way to combat illness and maintain good health.

Unfortunately this natural defence system can be inhibited by a number of factors, including nutritional deficiencies, unwanted pathogens, build up of toxins in the body, food intolerances and poor diet etc.

When this happens, we become ill!

Our philosophy is to work with the body's own self correcting mechanisms to eliminate these inhibiting factors, and boost its natural ability to heal.

We recognise that we are all different and have our own unique set of problems, that need a personalised solution.

That's why we developed the *bionetics* hair testing system. This test identifies the unique set of factors that are inhibiting your body's defensive powers and healing ability. This information enables *bionetics* and your Practitioner, to recommend remedies which have already proven successful in tackling your particular set of issues.

The *bionetics* Hair Test

bionetics have developed an affordable new TEST which can help to pinpoint the set of factors which may have led to the onset of your poor health, and which helps to identify the best set of solutions needed to help your body.

Just two or three strands of your hair are required to conduct the test.

The test covers four key areas.

Pathogenic stresses, Toxic stresses, Nutrient Deficiencies, and Food Intolerances.

All are known to be factors that can inhibit the performance of your natural defence and healing processes.

As soon as your particular inhibiting factors have been identified, the system is used to find the optimum set of solutions to meet your needs. This includes identifying the specific herbs and homeopathy which can be used to help the body to rid itself of unwanted pathogens and toxins, by identifying the supplements required to correct any essential nutritional deficiencies, and by providing a list of foods to which your body has become intolerant and should be avoided.

The details are provided in a full written report.

How does it work?

Your hair has an amazing ability to store information relating to the body's chemistry and energy. The information is held in the form of very subtle energy patterns or "signatures". The energy patterns of hundreds of natural substances which make up the body and its processes, or can effect them, are stored in the root of your hair. At the *bionetics* laboratory, your hair is scanned by a very sensitive electronic machine, which captures the energy patterns that represent your unique personal data set. These are then processed by a powerful computer program. This compares your readings with established averages, to highlight problem areas. The data is processed again to identify solutions which have previously proven effective for your personal set of conditions. The results are then reviewed by a qualified practitioner and additional notes are added to the report where appropriate.

How to apply for your test

The *bionetics* hair test costs only £48 (including VAT) which includes a comprehensive report of the results. It can be ordered on line at www.bionetics.co.uk.

All major cards are accepted via the secure SECpay system when ordering online.

Or ask your practitioner for the postal application service. (£3 extra by post)

What our clients say

I must say that I have been extremely pleased with the outcome so far and have recommended yourselves to several people."

Carole - Devon

I can now plan things in advance and expect to be able to carry them through.

Lisa - Berkshire

After 10 days he began to feel some improvement, and by the end of the course was back at work after 5 months of being unable to do hardly anything! Thank you so very, very much - we are delighted.

Ann - Dorset

My consultant is amazed and quite frankly so am I. My PSA score is down for the 3rd time!

Don - Bucks

Since I found Bionetics I haven't looked back - the first month was hard as it involved a whole dietary life change, but now I have energy and enthusiasm (my spark has returned), my weight has stabilised

Bart - Berks
